PROFESSIONAL SUMMARY

Dedicated Electronics and Communication Engineering student seeking an entry-level opportunity to leverage technical knowledge, practical project experience, and a strong willingness to learn. Committed to contributing effectively to team objectives while developing professionally in a dynamic work environment.

EDUCATION

VSB College of Engineering Technical Campus, Coimbatore

Bachelor of Engineering, Electronics and Communication Engineering | CGPA: 8.74 | 2023 - 2027

Government Girls Higher Secondary School, Madukkur

Higher Secondary Education (12th Grade) | Percentage: 83% | 2022 - 2023

TECHNICAL SKILLS

Programming Languages: Java (Basic)

Frameworks & Libraries: React.js, HTML, CSS

Tools & Platforms: Visual Studio Code, Git, GitHub, Render, Canva, Discord, Vercel

Core Competencies: Embedded Systems Basics, Problem Solving, Teamwork, Communication

PROJECTS

Sentiment & Urgency Detector | *FastAPI, Python, HTML, CSS, JavaScript, Groq API (Llama 3.3 70B), GitHub, Render*

- Built a real-time AI-based web application to analyze customer support tickets and surface critical issues for faster resolution
- Integrated Groq Cloud's Llama 3.3 70B model via API to predict sentiment, urgency, tone, and churn risk, and to auto-generate AI-powered draft replies
- Deployed the application end-to-end using GitHub and Render, making it accessible through a live web interface

Jewellery Website - Frontend Development | *React, HTML, CSS, JavaScript*

- Designed and developed a responsive jewellery website with dynamic product listings using React
- Built reusable UI components for navigation and interactive product display, improving code maintainability
- Ensured cross-device responsiveness and a clean user experience through structured CSS and component layout

Fire Fighting Robot | *ESP32, Arduino IDE (C), Flame Sensor, L298N Motor Driver, DC Motors, Relay Module, Water Pump*

- Developed an ESP32-based autonomous robot that uses flame sensor input to detect fires and navigate toward them via L298N-driven DC motors
- Integrated a relay-controlled water pump for automatic fire suppression upon flame detection

INTERNSHIP EXPERIENCE

Web Development Intern - *Qbatzclay*

- Built responsive web pages using HTML, CSS, and JavaScript, translating designs into functional interfaces
- Developed structured, reusable front-end components that improved overall interface consistency and usability

Embedded Systems Intern - *Emglitz Technologies*

- Implemented embedded applications using microcontrollers and sensor interfacing in guided mini-projects
- Applied hardware-software integration concepts to connect sensor input with real-time output control

CERTIFICATIONS

- Static Web Development - Qbatzclay
- Basics of Embedded Systems - Emglitz Technologies
- VLSI Digital Design: Chip Design and Verilog Programming - Infosys Springboard
- IoT Edge Computing and IoT Analytics - Infosys Springboard
- SQL (Basic) - HackerRank
- CSS (Basic) - HackerRank

RESEARCH / PATENT WORK

Development of Fire Safeguard Emergency Robot with GPS

- Designed a fire safety robot concept with GPS-based location tracking, integrating embedded control, mobility, and wireless communication for hazardous-environment emergency response

Wastewater Treatment using Electrocoagulation

- Proposed a low-cost electrocoagulation system to remove wastewater contaminants for industrial and domestic use
